(E) Kodak's Newest Starflash and Starflex Camera Outfits. Designed to take both color pictures and slides or black and white pictures with equal ease. Only a flick of the lever below lens changes these cameras from regular snapshot cameras to thrilling color cameras for both Kodacolor pictures... and exciting life-like Ektachrome color "super" slides—for use in viewers or most 2x2-in. slide projectors. Wait till you see the results—from even your first roll of film, you'll have full color "Super Slides". New Dakon lens is in focus with color films from 5 ft. to inf. With black and white film, objects beyond 4 ft. are in focus.—and lens lets in twice the light of most snapshot cameras for brighter pictures. Has "feather touch" shutter release so you won't blur pictures. Double exposure prevention device. Makes 12 3½x3½-in. black and white or Kodacolor prints on 127 film or 12 "Super Slides"... on Ektachrome 127 film. Compact design—solidly constructed of gleaming Black plastic with chromed trim.
